

# Dinosaurs *in Scripture*

by Jeremy Michel

A journey to discover the scientific evidences confirming faith

**I've been on a journey to learn, with my family, how dinosaurs fit into the Holy Scriptures.**

**Do Science and Religion work together or oppose?**

**THIS IS NOT JUST ABOUT DINOSAURS.**

**THIS HAS DOCTRINAL AND SPIRITUAL IMPLICATIONS AFFECTING OUR DIVINE IDENTITY.**

**Our children are being taught they evolved from apes; Is this accurate? Or should we trust the accuracy of the scriptural accounts that tell us God created all animals and caused them to reproduce in their own sphere and element. Is it also accurate that we were created in the image of God?**

**We firmly believe that God created us in his image, and every animal, and every creature. We also testify that he created the dinosaurs and that they lived with Adam and man. This shows us they were not millions of years old and we did not evolve from apes.**

# "I, God, created the heavens and the Earth"

**God used matter unorganized to create the stars and planets in the heavens. He *moved upon the face of the waters* to create our water filled planet.**

**Water forms a perfect sphere in space and water gives life to all things. Credit: Universal Model**

## The doctrine of the creation is vital to our foundational understanding of the Gospel.

If God created us in His image and He created all the animals as stated in scriptures; then we did not evolve by random chance, and the scriptures are literal and accurate.

This shows that accurate scripture records HOLD THE KEY to SALVATION through his son Jesus Christ!

An important doctrine:

**Ammon, when he taught King Lamoni, opened to the scriptures and began at the Creation. ALMA 18:36**

## We were made in the image of God.

This is so important that it is referenced at least 9 times in canonized scripture:

- **1 Cor 11:7** - *he is the image and glory of God*
- **Abraham 4:26** - *let us go down and form man in our image*
- **Moses 6:9** - *In the image of his own body, male and female, created he them, and blessed them,*
- **Moses 2:26** - *Let us make man in our image after our likeness*
- **Alma 22:12** - *how God created man after his own image*
- **Alma 18:34** - *in the beginning was created after the image of God*
- **Mosiah 7:27** - *he said that man was created in the image of God*
- **Ether 3:15** - *Yea, even all men were created in the beginning after mine own image*
- **Gen 1:26** - *God said, Let us make man in our image, after our likeness*

## **MODERN PROPHETS SPEAK ON THE MATTER:**

*"Surely no one with reverence for God could believe that His children evolved from slime or from reptiles."*

**~ Boyd K Packer**

**"Yet some people erroneously think that these marvelous physical attributes happened by chance or resulted from a big bang somewhere. Ask yourself, could an explosion in a printing shop produce a dictionary? The likelihood is most remote. But if so, it could never heal its own torn pages or reproduce its own newer editions!"**

**By Russell M. Nelson " Thanks Be to God," April 2012**

**Were there dinosaurs  
in the Garden of Eden?**  
We say YES! and we will show you the  
evidences we have found on this spiritual  
and scientific journey of discovery.

**God created "every thing which creepeth."  
 He specifically mentions the cattle, the whales, the birds,  
 and commanded them to reproduce after their kind.  
 This Professor at BYU, Jeffrey R. Chadwick, did some work  
 on the hebrew translation on whales. His unpublished  
 essay finds another look at the translation. He describes  
 how the hebrew word could actually be referencing a large  
 reptile.**

**Dinosaurs might be mentioned in the first  
 chapter of all scripture.**

*Hebrew translation shows the word "thninm" or Tan-  
 nin meaning Crocodile, monster, reptile, or Dragon.*

הַתְּנִינִים  
 e · thninm  
 the · monsters

הַגְּדִלִים  
 e · gdlim  
 the · great-ones

**Created the Great Tannin in Hebrew  
 meaning Dragon or crocodile.**

*Gdlim" meaning great or stretched out. This could mean the great  
 reptiles with stretched out necks, or what we would refer to today as  
 sauropod dinosaurs such as Brachiosaurus.*

הַתְּנִינִים      This is a dragon

# Dinosaur and Man

- His bones are like bars of Iron,
- He moveth his tail like a cedar.
- is bones are as strong pieces of brass;
- his bones are like bars of iron.
- He is the chief of the ways of God:
- his nose pierceth through snares.
- Chief of the ways of God.

*Job 40 in the Bible. Behold now Behemoth. God tells Job to behold this animal. God does not tell Job to behold something he cannot see. This is an animal that existed along with Job his description is detailed in the good book:*

**(spoiler alert) We hope to demonstrate that they were nearly wiped out by a universal flood. That the dinosaurs after the flood were called dragons. and that the evidence for ape to human evolution is non-existent, revealing a failing psuedotheory. Please come along on this journey for truth with us!**

**Dinosaurs and man living together, what a crazy idea in today's age with the dominant theory of evolution and millions of years. There is more evidences as we will show in the Bible, Book of Mormon, and fossil and historical records.**

**This carving is found in the ruins of ancient temples in Angkor Wat Cambodia. It seems to depict an animal similar to a Stegosaurus with plates on its back.**

**Pottery found in Egypt displays long necked animals. These ones are large in comparison to the men around them. They seem to be roping or taming them.**

*Photo 1: The main case for human tracks was made at the Taylor site, where the long "Taylor Trail" (over 20 impressions, bottom to top) and two other trails intersected a long trail of deep dinosaur tracks (lower left to middle right). Even though the trails appeared to contain imperfect "human" tracks, some in each trail transformed over the next decade into clear dinosaur prints.*

**Paluxy river formation theropod tracks near human**

**In Glen Rose, Texas, they have been digging up dinosaur tracks next to human tracks in the Paluxy river formation.**

# DINOSAURS CONTEMPORANEOUS WITH MAN

Researcher, Vance Nelson, documented his recent journey to the Amazon rainforest in Peru. He demonstrates how the carbon-14 “plasma oxidation” validates an ancient depiction of what appears to be a sauropod dinosaur surrounded by nine hunters. Tests were performed at a secular university in the USA, and the results indicated that the rock wall depiction was painted about 1300 BC – most likely, after a successful hunt!

This is animal that lived with man and was apparently hunted here by these natives.

His book "Amazon Expedition" is for sale

The Ica stones in Peru have some renown as they are depicting dinosaurs with man riding or hunting them.

**Other man made figurines of dinosaur like creatures show one man riding on top.**

**Can we use Fred Flinstone as historical evidence?**

## DINOSAURS, DINOSAURS EVERYWHERE!

**In Australia this cave art is depicting men throwing spears at a water dwelling creature with a long neck and fins. It apparently ate one of their friends and the men are getting retribution with their spears if lucky.**

**Middle eastern carvings that have survived rigorous weather for thousands of years depict long neck creatures nothing like a giraffe. Note the long tails as well.**

**In my Home state of Utah there is a very interesting native American petroglyph of a long necked animal depicted under Kachina Bridge, at Natural Bridges National Monument.**

**Hiking down into the steep canyon was an adventure with small children. However, the greater challenge lie ahead.**

**The Native American Petroglyphs were much higher than expected and unreachable by foot. After rigging a clever contraption, to reach our goal, I found myself stuck on top of the cliff outcropping. My wife, unable to get me down or to carry me home if I were to break a leg, waited until we were able to find some passer bys who helped with the decent!**

**The petroglyphs were authentic and interesting. We were happy to have returned home safely and seen amazing, ancient petroglyphs. I was later marveling at the large bird compared to the small man.**

**Why are there long necked dinosaur looking animals next to 9 other real known animals today surrounding Bells Tomb?**

**Bishop Bell's tomb in Gloucester England**

# Why would Babylonians depict these long necked animals alongside a realistic lion and bulls if they were not animals they had witnessed?

**The Ishtar Gate of Babylon  
Uncovered in Modern Day Iraq.**

**The gate is displaying Bulls, Lions, and Dragons. It  
was built in approximately 575 B.C.**

**The excavation of the city gate ruins began in 1899.  
In 1902 the Gate was found and excavated.  
After war broke out the excavations stopped until  
1979 when Saddam Hussein began to rebuild the  
ancient gate on the ruins.**

**Today Berlin's Pergamon Museum displays these  
larger replicas of the gate.**

# WHY DOES THIS MATTER?

Sometimes I hear: "I'm not into dinosaurs, Jeremy" or "It doesn't matter to me if the dinosaurs were millions of years old."

Here are two reasons this is important to everyone:

- 1) If you are looking for meaning in your life, knowing who you are and where you come from are vital. If you originated from an ape or from God changes everything. It affects our actions, our goals, and dreams.
- 2) The truth always matters. "The truth shall make you free". John 8:32. We could go deeper into this, but ultimately we should seek after and desire truth because truth prevails for eternity and it matters in 1,000 years.

If the dinosaurs aren't millions of years old there is no time for the supposed mechanism for animals to transition and evolve from one kind to another. It has never been observed in our day. A dog has never given birth to a cat. Deep time is required for this fairy tale to have a chance.

With evolution being the only substantial opposition to giving God the credit for design and intentional creation. Once evolutionary theory is removed there is only a divine creation of all things. This then supports that we are created by God in his image and we are his children, Heirs to his throne and accountable on earth for our actions. Removing God is arguably the biggest motivation for evolutionists.

In a trial case we would find the motive and the mechanism. We have, and will identify and dissolve both of these.

Many who have spent their lives studying scripture and internalizing doctrines of divine identity might be less swayed by pseudo-science and false doctrines.

Whereas, others may have been swayed some by the supposed

# Changing Perception:

"You are the lens through which you see the world" Stephen Covey

Do you see an old woman or a young lady? Perception can change with new data.

As we look at the data with **NEW EYES** we can see a totally different picture.

We will show you later how the prevailing paradigm has hindered real scientific discovery. When people let false assumptions lead progress is blocked.

This is common to all people. We have inherent and undeniable bias in our actions, simply because we are human. We have experiences and beliefs that influence the data we process and how we interpret that.

No one willingly wants to self incriminate. Humans want to protect themselves. In a courtroom we have the 5th amendemnt so that a person doesn't have to testify against themselves. As long as bias is disclosed and transparent the receiver will know the motive, and all parties are informed. This is proper human interaction with integrity.

**My bias is clear; I come from a religious view. I want to prove the scriptures accurate and true.**

**Are scientists disclosing their bias and glasses to which they interpret the data? In the section on Lucy the "missing link" we will show the strong bias of the discoverer.**

**Many are blind to truths right in front of them.**

**Jesus taught "those with eyes to see and ears to hear" teaching that we have to seek for and desire to learn or it will go right past us.**

Matthew 13:15-17 KJV  
For this people's heart is waxed gross, and their ears are dull of hearing, and their eyes they have closed; lest at any time they should see with their eyes, and with their ears, and should understand with their heart, and should be converted, and I should heal them.  
But blessed are your eyes, for they see: and your ears, for they hear.  
For verily I say unto you, That many prophets and righteous men have desired to see those things which ye see, and have not seen them; and to hear those things which ye hear, and have not heard them.

# THE SCRIPTURES ACCURATELY DEPICTED FLYING REPTILES:

1 Nephi 1:17 – "... because of their iniquity. He sent **fiery flying serpents** among them; and after they were bitten he prepared a way that they might be healed; and the labor which they had to perform was to look."

Was this a snake with wings or could it have been closer to a dimorphodon or today's kongomato that attacked fisherman in deep African jungles?

As the Chinese zodiac shown on page 20 separates snakes and dragons. This seems to illustrate that snakes could be separate creatures from the broader term, serpents. Just as today dinosaur can reference dozens or hundreds of species of dinosaur.

Jesus spoke of another unknown animal today. The cockatrice was worthy of mention in precious scripture space.

**As fire produced light in ancient times, this might explain the fire attribute of this flying serpent. This article documents sightings of a flying animal similar to this pictured above.**

More info here: <https://www.genesispark.com/essays/fiery-serpent/>

**Herodotus, A Greek historian documented serpents that could fly. " These winged drakontes were said to live under frankincense (Boswellia) trees in the Arabian Desert. To gather the incense, the Arabians burned styrax (resin of the Liquidambar tree) because the smoke drove the winged snakes away. Herodotus described the flying reptiles as small with variegated markings, shaped like a water snake but with wing like membranes, like bat wings."**

<https://www.wondersandmarvels.com/2013/03/flying-snakes-in-ancient-egypt.html>

This is what we sometimes imagine. What an odd looking animal. Probably LESS like this...

Could this ancient painting be a closer representation of a fiery serpent or the cockatrice?

AND MORE LIKE THIS...

# TEMPORAL TEACHING TOOLS:

Lehi Taught the spiritual significance of the serpent event **"and because of the simplicity of the way, or the easiness of it, there were many who perished."** They were taught to look unto Jesus Christ!

**LOOK TO JESUS CHRIST FOR  
HEALING.  
LOOK AND YOU SHALL  
LIVE.**

This teaching moment was to allow us to learn from physical, mortal lessons to look for spiritual growth and strength to him who can heal us if we but come unto him.

**The Suicide of Saul oil painting depicts a battle scene with men riding on a long necked sauropod-like dinosaur. The painting created in 1562 by Pieter Bruegel the Elder, is portraying Saul's defeat by the Philistines as describes in 1 Samuel Chapter 31.**

**This mayan painting shows an animal with a ferocious appearance one might compare to a raptor or an allosaurus dinosaur known today.**

**The chinese culture is one of the oldest preserved cultures on earth. They still use this zodiac calendar depicting 11 known animals and a 12th dragon. Why would they have a dragon with these real known animals if it was a mythical creature.**

# BOOK OF MORMON REFERENCES:

**Jaredites and serpents. The word serpent is ambiguous at times. The Chinese zodiac shows a snake and a dragon. This should help us separate the two ideas.**

**Now that we have separated the word serpent from other reptile like animals that might be extinct from the earth and wiped from our knowledge and understanding, we can group these creatures into another taxonomy other than that of snakes.**

**Ether 9:31** *"And there came forth poisonous serpents also upon the face of the land, and did poison many people. And it came to pass that their flocks began to flee before the poisonous serpents, towards the land southward, which was called by the Nephites Zarahemla.  
32 And it came to pass that there were many of them which did perish by the way; nevertheless, there were some which fled into the land southward.*

*33 And it came to pass that the Lord did cause the serpents that they should pursue them no more, but that they should hedge up the way that the people could not pass, that whoso should attempt to pass might fall by the poisonous serpents.*

**A cockatrice is another animal unknown to us today. Jesus speaks of a cockatrice. I assume this is an extinct animal that lived thousands of years ago and has gone the way of the Dodo bird. Let us recognize that the ancient people might have known of species that are extinct; animals we have never heard or seen.**

WE DUG DEEPER! And in the days of Lib the poisonous serpents were destroyed. AND THEN **Wherefore they did go into the land southward, to hunt food for the people of the land, for the land was covered with animals of the forest.**" Why didn't they go HUNT in the land southward for 9 generations!?! Nearly 200 years!

**GENERATIONS –**

Heth,

Shez “live to exceeding old age, did build up many cities,

Riplakish – lived 42 years,

Morian-ton- exceedingly great age,

Kim,

Levi,

Corom “and after he had seen many days he did pass away”,

kish,

**Lib “In the days of Lib the poisonous serpents were destroyed”**

**We are asked to liken the scriptures unto ourselves. I ASK YOU dads and men, WHAT snake could chase you out of your homes and cause you to up and move?**

ARE THESE THE SNAKES THAT COULD CHASE YOU AND YOUR FLOCKS AWAY FROM YOUR LANDS?

# OBSERVABLE SCIENTIFIC EVIDENCE:

We have focused on historical evidence from ancient carvings, paintings, artifacts, and historical writings and scripture. Now we will touch on observable facts today that substantiate the hypothesis that dinosaurs are only thousands of years old.

2005 - Mary Schweitzer finds soft tissue in Dinosaur bone!

The discovery was an accident because they never expected to find soft tissue in supposed 66 million year old bone. She told her assistant to “do it again” even 16 times they did it and got the same result. As proper science goes it was REPLICABLE.

Mary a PALEONTOLOGIST AT NORTH CAROLINA STATE UNIVERISTY

This groundbreaking Discovery in the peer review process was not well received. They believed it was “impossible” and they thought the samples were contaminated. But this has now been proven to be real soft tissue without any infiltration or corruption in the samples.

Schweitzer said “I didn’t want to tell anybody. She was worried that she would be ridiculed for the discovery. Why would that be?

She was in fact attacked. Thirteen years later, in 2018, she reported other scientists were still “trashing her in the press”. Why would scientists fight this discovery? Schweitzer later reported that she waited an entire year to tell scientists about the initial discovery. Why wouldn’t they be excited to learn new revolutionary information? What prevailing theory or worldview would cause them to oppose this?

**This evidence suggests that dinosaurs were not millions of years old. These tissues only last around 30,000 years. An outlier study shows 900,000 years. but that is a far cry from 65-150 million years.**

**B**

## Soft Tissue in Dinosaur Bone:

What I personally saw in a microscope:

**Watch the 60 minutes interview here:**

# Why was her discovery so controversial?

## Schweitzer's Dangerous Discovery

by BARRY YEOMAN on APRIL 1, 2006

When this shy paleontologist found soft, fresh-looking tissue inside a *T. rex* femur, she erased a line between past and present. Then all hell broke loose.

*Originally published in Discover.*

### EVER SINCE MARY HIGBY

SCHWEITZER peeked inside the fractured thighbone of a *Tyrannosaurus rex*, the introverted scientist's life hasn't been the same. Neither has the field of paleontology.

Two years ago, Schweitzer gazed through a microscope in her laboratory at North

<https://www.discovermagazine.com/the-sciences/schweitzers-dangerous-discovery>

[https://www.youtube.com/live/gXHS\\_c6AHkQ?si=J4oWDLjYTQqCJnAR&t=931](https://www.youtube.com/live/gXHS_c6AHkQ?si=J4oWDLjYTQqCJnAR&t=931)

**She did the test 16 times before reporting it. And she waited a year. Which is NOT a required part of the scientific method. But she is working on falsifying it. This is how science is to be done.**

**Iron in the blood; they are now looking to see how it can last so long. Iron in hemoglobin when released is now being shown to preserve soft tissue. Not to the extent 150 million years.**

**The only problem here is the underlying assumptions that have not been reassessed. NO ONE has asked "COULD these fossils be younger than 66 million years old?"**

**THE PREVAILING THEORY in every text book and museum is that they are millions of years old.**

**Remember, if they are not millions of years old this throws a wrench in the narrative of evolution. A massive wrench.**

**This is an industry with hundreds and thousands of scientists and support staff and universities teaching and profiting from this. Millions upon millions in government grants. They have so much to lose.**

**IF EVOLUTIONARY THEORY FAILS, GOD WINS. Many do not want that.**

**It is said that 9 in 10 evolutionary scientists are atheist.**

**Some now argue the theory is in crisis. The altenberg 16 group called for an extended evolutionary synthesis to redress the data and arguments supporting long held evolutionary fundamentals.**

**THE ALTENBERG 16:**

**AN EXPOSÉ  
OF THE  
EVOLUTION  
INDUSTRY**

"Running out of superlatives...  
Brilliant, a Brueghel really."  
Nixon biographer  
**ROGER MORRIS**  
"Very glad to see the book."  
**NOAM CHOMSKY**

**SUZAN MAZUR**

# THIS IS GOOD SCIENCE

Science is repeatable, falsifiable, and observable.

This might be the reason the discovery has been met with intense opposition:

A) The research is hard to refute because it was done right. They are now assuming iron was the preservation agent. But this still does not get them to the time of the Jurassic period (65-190 million years old) They ASSUMED for decades that this wasn't even possible and therefore never even tried. The theory comes before the data.

You would think there would be collaboration on such a breakthrough. "The problem is, for 300 years, we thought, 'Well, the organics are all gone, so why should we look for something that's not going to be there?' and nobody looks," Schweitzer said. This demonstrates the power of personal bias and the effect of worldview beliefs on scientific advancement.

B) They have a lot to lose. Museums, text books, and entire research programs are built around evolutionary theory. Careers are dependent on the flow of money supporting the narrative. This is how pseudoscience becomes institutionalized and entrenched. It is not conspiracy. It is massive groupthink.

Mark Armitage won a \$399,500 settlement with California State University for wrongful termination. Settling seems to mean they felt CSUN would lose in court.

NOW OTHER SCIENTISTS ARE DISCOVERING THIS.

Mark Armitage made the discovery and was subsequently fired. "Mark's article was pure science," Reinach said. "The article only presented his findings, and did not mention anything about his creationist beliefs."

Another defendant in the case was CSUN biology professor, Dr. Ernest Kwok, who became Armitage's new supervisor in June 2012.

The lawsuit stated that in the weeks leading up to his termination, Dr. Kwok confronted Armitage while in his lab, and allegedly shouted, "We are not going to tolerate your religion in this department."

**Dinosaur Provincial Park**  
**"their bones were buried in new layers of sand and mud"**

**At one location in the canadian monument, a bonebed of hundreds of Centrosaurus remains was discovered. Some researchers believe that the animals died in a flood and were deposited together. They are estimating more than 1,000 centrosaurus were buried here:**

<https://parks.canada.ca/culture/spm-whs/sites-canada/sec02c>  
<https://allosaurusroar.com/dinosaur-provincial-park-alberta-canada/>

In Agate Springs, Nebraska a fossil graveyard of around 9,000 animals was found buried in alluvial deposits. The remains of hundreds of rhinos, three-toed horses, camels, giant wild boars, birds, plants, trees, sea shells and fish are mixed and intermingled in great confusion.

<https://www.nps.gov/agfo/learn/nature/agate-bonebed.html>

The Ashley Beds was an enormous phosphate graveyard that contained mixed remains of man with land and sea animals, notably crocodilians, ichthyosaurs, hadrosaurs, plesiosaurs, whales, sharks, Zeuglodon, monkeys, rhinos, horses, mastodons, mammoths, porpoises, elephants, deer, pigs, dogs, and sheep.

### Morocco: BURIED IN MUD AND SEDIMENT

Morocco contains some of the world's richest fossil sites and has seen international interest from fossil collectors since the early 20th century. As interest in collecting fossils grew in the late 20th century, the Moroccan fossil trade grew into a lucrative industry of its own. More than 50,000 Moroccans earn their living in mining, trading or exporting fossils and the industry itself is worth more than \$40 million annually.

The Gobi Desert is renowned as one of the richest areas in the world for the discovery of dinosaur fossils, including the Velociraptor, Gallimimus, and Tarbosaurus.

**GOBI DESERT,  
MONGOLIA,**

The mystery has haunted paleontologists for decades: What explains a fossilized mass death event in the rocks of the West Union Canyon in Nevada? Even more mysterious: Why are the victims all large predatory marine reptiles called ichthyosaurs that swam the seas while dinosaurs walked the earth?

One research team says in a paper published Monday in the journal Current Biology that this enigma in stone has finally been solved.

Dec 30, 2008 11:09 GMT · By Tudor Vieru · Comment · Share: Twitter Facebook Google+ YouTube

The eastern Chinese province of Shandong is home to the world's largest mass dinosaur grave, as proven by the unbelievable number of fossils that have thus far been unearthed in more than 30 locations around the site. According to local authorities, more than 7,600 remains have been recovered from their rocky tomb and cataloged. The official Xinhua news agency made the announcement on Tuesday. A 300-meter (980-ft) long trench near the city of Zhucheng, locally known as Dinosaur City, yielded the impressive archaeological findings. Scientists have thus far dug up numerous bones belonging to full skeletons, and have already discovered a species of hadrosaurus that is some 20 meters

## New fossils may capture the minutes after the dinosaur-killing asteroid impact

A North Dakota site appears to hold fish, other organisms swiftly buried in the strike's wake

DEEP IMPACT These fossil fish, discovered in North Dakota, were swiftly buried in mud, perhaps due to violent shaking of their home. The fossil site, researchers say, gives a never-before-seen view of the day a giant asteroid struck Earth, 66 million years ago.

**Swiftly buried in mud perhaps due to violent shaking of their home. Uniformitarianism has been replaced with the asteroid theory due to the massive amount of evidence for catastrophic events.**

# Massive Catastrophic Worldwide Flood

**How do you get a Petrified Jelly Fish over millions of years?**

**Or Eggs to preserve?**

**The Universal Model describes these processes in detail**

**Arched necks showing drowning and suffocation.**

**This "Death pose" is common among dinosaur skeletons. Additionally they are now finding evidence of suffocation in the bones.**

**Fossils provide universal evidence of rapid burial, and even agonizing death. Rapid burial is necessary to entomb organisms as the first step in fossilization.**

# THE SCIENCE OF FOSSILIZATION

It is clear that dinosaur remains were rapidly buried before substantial scavenging could take place. Remains of dinosaurs that were washed into the fluvial systems are found buried in actual river channels, whereas others are found out on the former floodplains at the location where they fell and were covered by sediments from floodwaters that breached river banks.

Studies by taphonomists (paleontologists who study the transition of animals from the biosphere to the lithosphere; taphonomy literally means "burial laws") have shown that organisms that die on land in lush jungle locales are rarely fossilized. In these settings, there is little chance of being buried, scavenging vertebrates and insects are prevalent, bacteria that break down flesh and bones are abundant, and the soils are extremely acidic and tend to dissolve bones.

<https://www.scientificamerican.com/article/what-are-the-odds-of-a-de/>

**"As we brushed back the sediment, well-preserved white bones appeared. The skeletons, still arranged as they had been in life, looked as if they had been resting peacefully for millions of years. We guessed that the creatures had been buried in minutes, perhaps by a flash flood of an ancient river" (Sereno 1996: 116). Sereno, P. 1996. "Africa's Dinosaur Castaways." National Geographic 189, no. 6.**

**Today deer, and elk, and cow bones are rotted, decayed, and scavenged in only 5-10 years before they are completely gone. NOT fossilized or petrified.**

**American colonials killed millions of bison on the plains of the midwest. None of these fossilized or went through petrification. They needed to be in the correct environment for fossilization to occur. The mass event during the Universal flood was uncommon and extremely rare. It was as God commanded.**

## **Fossilization and petrification was for the most part a one time event on earth.**

One unlucky day this landlubbing animal ended up dead in a river, possibly swept in by a flood. The belly-up carcass wended its way downriver—kept afloat by gases that bacteria belched into its body cavity—and eventually washed out into the seaway, scientists surmise. Winds blew the carcass eastward, and after a week or so afloat, the bloated carcass burst. The body sank back-first onto the ocean floor, kicking up soupy mud that engulfed it. Minerals infiltrated the skin and armor and cradled its back, ensuring that the dead nodosaur would keep its true-to-life form as eons' worth of rock piled atop it.

# THERE IS SCIENCE IN SCRIPTURES

"There is no science in the scriptures." some may say. It is only a spiritual account. Yes, prophets, mostly focused on spiritual matters but there are a few events that show temporal events accurately and all things are connected to the spiritual world.

## Examples of science in scripture:

- **Heliocentrism:** *"this is so; for surely it is the earth that moveth and not the sun"* Helamen 12:15
- **Earth and planet movement:** *"All things denote there is a God yea, even the earth... and its motion, yea, and all the planets which move in their regular form do witness that there is a supreme creator."* **Alma 30:44** This shows that the earth and planets do move and is evidence of a great creator!
- **Reproduction:** *"and God sad, Let the earth bring forth the living creatrue after his kind,"* **Genesis 1:25** we see no "transitional species" animals that interbreed between kinds usually become sterile.
- **Reproduction:** *"And God blessed them, saying Be fruitful, and multiply, and fill the waters."* They reproduce naturally,

## PETER WARNED OF SCOFFERS DENYING THE FLOOD. 2 Peter 2

[2] That ye may be mindful of the words which were spoken before by the holy prophets, and of the commandment of us the apostles of the Lord and Saviour:

[3] Knowing this first, that there shall come in the last days scoffers, walking after their own lusts,

[4] And saying, Where is the promise of his coming? for since the fathers fell asleep, all things continue as they were from the beginning of the creation.

[5] For this they willingly are ignorant of, that by the word of God the heavens were of old, and the earth standing out of the water and in the water:

[6] Whereby the world that then was, being overflowed with water, perished:

**All things continuing as they were from the beginning is a uniformitarianism point of view with things slowly evolving over millions of years.**

# Book of Mormon Display of Catastrophe

**Scriptures speaking of a flood in every major book of scripture:**

- **D + C 138:41** *"Noah who gave warning of the flood;"*
- **Moses 7:34** *"And the fire of my indignation is kindled against them; and in my hot displeasure will I send in the flood upon them,"*
- **Mathew 24:38** *"For as in the days that were before the flood they were eating and drinking, marrying and giving in marriage, until the day that Noe entered into the ark,"*
- **Genesis 6:17** - *"For I, even I, do bring a flood of waters upon the earth to destroy all flesh"*
- *Alma 22*

**We see the Geologic destruction before Christ came to America:**

*"all these great and terrible things were done in about the space of three hours—and then behold, there was darkness upon the face of the land."*

*9 And the city of aMoroni did bsink into the depths of the sea, and the inhabitants thereof were drowned.*

*10 And the earth was carried up upon the city of aMoronihah, that in the place of the city there became a great bmountain.*

*12 behold, the arwhole face of the land was changed, because of the tempest and the whirlwinds, and the thunderings and the lightnings, and the exceedingly great quaking of the whole earth;* **3**

**Nephi 8:19**

**Massive destruction in the Americas in only 3 hours! The scriptures spoke of an actual flood that killed all flesh. The fossils show it, the history shows it. It was real. God brought the flood to save the righteous. We can seek him for safety then and now.**

# Mount St Helens - Catastrophe

**On March 27, 1980 the world was shocked to see this explosive event. An eruption column rose 80,000 feet (24 km; 15 mi) into the atmosphere and deposited ash in 11 U.S. states and two Canadian provinces. At the same time, snow, ice and several entire glaciers on the volcano melted, forming a series of large lahars (volcanic mud slides) that reached as far as the Columbia River, nearly 50 miles (80 km) to the southwest. Steam and water flowed from out from inside the earth.**

**57 people died in the blast and aftermath of the destruction.**

**THE ENTIRE SIDE OF THE MOUNTAIN WAS BLOWN OFF.  
Equivalent to 24 Megatons of TNT. or 27,000 Nuclear bombs simultaneously exploding.**

# CANYONS FORMING IN A MATTER OF WEEKS

**On March 19, 1982 spirit lake dam broke causing mud flows that formed a new canyon: the North fork of the Toutle river.**

**Westward view looking down the North Fork of the Toutle River in August 1984. The rockslide and pumice deposited in the region of the headwaters of the river have been eroded to a depth of more than 100 feet forming a new dendritic drainage pattern.**

**Twenty-five foot thickness of stratified pyroclastic flow deposit which accumulated in less than one day on June 12, 1980. The stratified flow deposit forms the floor of the pit in Figure 1 which was later eroded by mudflows to make the cliff exposure here.**

# NO ORDINARY FLOOD: RAPID LAYER FORMATIONS COVERING HUNDREDS OF MILES

**These flood waters covered the world in massive tsunami waves that have never been seen before or since. The layers left behind covered hundreds of miles, nearly entire countries in some instances. The Morrison formation, for example, touches Utah, Nevada, Arizona, Colorado, Montana, Idaho, Wyoming and arguably reaches into Canada.**

**We see the uniform layers lined out smooth and even. This was not a long term process.**

**Randall Carlson Studied the magnitude of this flood and found boulders the size of a house moved by the flood waters.**

# FLOOD FORMATIONS

**THE GRAND CANYON:** The lack of biological activity between horizontally deposited sedimentary strata and flat gaps between missing strata (paraconformities) indicates rapid deposition. This biological activity in the subsurface, known as bioturbation, includes the burrows created by small organisms such as worms, insects, marine animals, and other small animals.

This, sandle, sand art desk toy we play with at home displays how different colored layers can be deposited quickly and still show layers that don't represent millions of years. Ours settles down layers in around 5 minutes.

Trees petrified and upright shows the rapid nature of the layers. NO tree would stand erect for millions of years without eroding while layers slowly form around them.

We learn from Mount St Helen's Spirit Lake how these formed from floating and bogged down logs. However this Universal flood would have been 200X the scale of that event.

# FLOOD LEGENDS

There are also many legends of cultures around the world speaking of a flood: While there are over a dozen we will only name a few:

**GREECE:** Deucalion and the Great Flood Zeus, in his fury, decided to punish humanity for Prometheus' actions. He planned to unleash a massive flood upon the Earth to eradicate all life. The flood was meant to be a cleansing and a lesson for humanity

**CHINA -** Yu the Great who founded the Xia Dynasty, the country's first. According to legend, the region had been plagued by floods for decades, and Yu rose to prominence for taming them. Little sign of these floods had been found until recently, when a team of researchers reported evidence of a massive deluge of the Yellow River around 4,000 years ago.

**CENTRAL AMERICA -** The Aztecs believed that only Coxcox and his wife, Xochiquetzal, survived the flood. They took refuge in the hollow trunk of a cypress -or, in some versions, a small boat - which floated on top of the water and finally banked on a mountain in Culhuacan.

**HAWAII -** Nu'u was a man who built an ark with which he escaped a Great Flood. He landed his vessel on top of Mauna Kea on the Big Island. Nu'u mistakenly attributed his safety to the moon, and made sacrifices to it.

**THAILAND -** The first man and woman created by the supreme god, Phu Ruthua. A thousand years passed, their descendants were wicked and crude as well as not interested in worshipping the supreme god. The god got angry and punished them with a great flood. Fortunately, some descendants survived because they fled into an enormous magical gourd

**SUMARIA-** The gods have decided to send a flood to destroy humanity. Enki, god of the underworld sea of fresh water and equivalent of Babylonian Ea, warns Ziusudra, the ruler of Shuruppak, to build a large boat, though the directions for the boat are also lost.

When the tablet resumes, it describes the flood. A terrible storm rages for seven days and nights. "The huge boat had been tossed about on the great waters." Then Utu (Sun) appears and Ziusudra opens a window, prostrates himself, and sacrifices an ox and a sheep.

**CREE native Americans -** Many centuries ago a great flood covered the earth, destroying all the nations. At that time, all of the tribes of the Coteau des Prairies climbed up the Coteau, a ridge emerging out of the prairie, in order to escape the rising waters. After the tribes had gathered, the water rose to cover them all, turning their bodies into a mass of red pipestone rock. From that day on, the Coteau has been considered neutral ground to all the tribes, and there they could meet in safety to smoke the peace pipe.

# NOAH'S ARK: Myth or Reality?

**NO doubt it was a massive feat! To build and load the ark. He might have used or hired locals for help. They might have worked for pay even though they didn't want to come along for a ride.**

**How could he fit all the species and kinds?**  
**Isn't it just a local flood?**  
**Seems like a fun child's story**

**Recent studies estimate the total number of living and extinct kinds of land animals and flying creatures to be 1,398. With our "worst-case" scenario approach to calculating the number of animals on the Ark, this would mean that Noah cared for 6,744 animals.**

**Noah was 600 years old! He was smart! He could have taken baby animals. They are smaller, they eat less and leave less waste. They also have longer breeding life after the flood.**

**There is also evidence the flood was in spring since petrified plants were budding and pinecones were closed etc.**

<https://www.sciencefocus.com/nature/are-any-dog-breeds-close-to-becoming-a-new-species>

### **NO Shitzu Poodle on the ark.**

**Nearly 200 new variations within the Dog kind in the last 150 years. All domestic dog breeds are able to interbreed to give birth to reproductively viable offspring. This is because their genomes remain relatively unchanged, despite their physical characteristics appearing so different.**

**Remember, God is a God of miracles. He can do his own work!  
2 Nephi 27:20**

### **AREN'T DOGS CHANGING INTO NEW BREEDS EVOLUTION? YES AND NO.**

**A short definition of terms is that micro evolution can be observed. While I prefer to call this speciation and differentiation. The animals genome never changes beyond the kind. It is only modified within the genetic framework given by the creator. For example, a horse and a donkey mate and create a mule. A seemingly new kind of animal. however this animal is now sterile and cannot breed.**

### **WERE DINOSAURS ON THE ARK?**

**We will cover that when we get to Dragons. Sneak preview... Was a giraffe on the ark? How do you know? because it is around today and survived the flood. Therefore if dinosaurs or dragons were alive after the flood and they can't swim, logically we can say they were on the ark.**

# SCIENCE IS LIMITED:

Can science explain how Jesus walked on water?

Or how he raised Lazarus from the dead?

Or how he calmed the stormy sea?

**NO.**

**Miracles will not always be explainable on this earth. But we need not explain away the scriptures just because we can't explain them in naturalistic terms.**

**"As the heavens are higher than the earth, so are My ways Higher than your ways and My thoughts higher than your thoughts"**

**Isaiah 55:9**

# DID THEY FIND THE ARK?

Many dismissed the site because it was too long. They were looking for a 437 foot ark (based on the hebrew cubit) this object was about 515 feet.

The Royal egyptian cubit was 20.62" meaning the ark as described in the bible at 300 cubits would be 515 feet.

Exactly the size of this object.

1959-while scanning for missile silos near Russia they came across this formation: RON WYATT DID DEEPER DIGGING IN the 1980s ON THE MOUNTAINS OF ARARAT. He prayed with friends for an earthquake and the sides fell down around the formation. in 1987 there was an earthquake.

# IF THEY DID FIND THE ARK, IT HAS POWERFUL IMPLICATIONS

**On June 20, 1987, Turkish officials dedicated the site for the official location of Noahs ark!**

**About 15 miles from the ark is the village of Arzep, formerly known as the Village of Eight, where the sea anchor stones were cut off the ark and landed underwater in this area.**

<https://www.arkdiscovery.com/noahsarkstones.htm>

**DROGUE OR ANCHOR STONES WERE FOUND IN THE VALLEY BELOW.  
Near the city of, These were used anciently to stabalize boats.**

# Why isn't the word DINOSAUR in the scriptures?

And for that matter why did you take so long to finally bring this up in the book? I'm sorry there is a lot to cover to connect the dots. You see there is a prevailing belief and paradigm in the mind of many and it takes a fair amount of evidence to sway the entrenched believer.

Just as computer and satellite are modern words. They are also not in scripture.

The word dinosaur wasn't coined until 1841 by Sir Richard Owen. Thus any animals of this type could very well have been classified as a type of dragon.

They would have been called Dragons.

While the modern paradigm that dragons are purely myth-similar to a fairies and mermaids - we maintain that there is substantial evidence showing dragons lived with man and were in fact dinosaurs.

This handsome lad is not Count Dracula, this is Sir Richard Owen, Naturalist acclaimed for coining the term "terrible Lizard" Dino-saur in 1841

If you search the term "dragon" in the 1957 Webster's Collegiate Dictionary it will show "Now Rare" under the title.

I have a copy for you if we meet in person. They can be purchased on Ebay as well.

Today the flag of Wales is still a dragon.

**As we make the connections between dinosaurs, dragons, flood-fossils, scripture and historical records, we hope the image will become clear to you. This will change a lifelong paradigm for many who have been taught, since children, in museums and books, as I was, that these animals are millions of years old or are myths altogether.**

**When a dragon gets dressed for the day he looks in the mirror to see a dinosaur looking back. Their similarities and comparisons seems to follow logic as we see their many similar traits.**

**This is a fabulous documentary to get your hands on!**

# DRAGON LEGENDS AROUND THE WORLD

**DRAGON LEGENDS** pervade ancient and modern culture alike. They had similar reptilian traits across oceans for thousands of years. Some of their traits were: wings and 2 to 4 legs, with scales, and hiding in caves. Remember, just as there are different species and kinds of dinosaurs there were likewise many kinds of dragons.

**This is a fabulous documentary to get your hands on!**

# Dragons in History

## Marco polo recorded encounters with Dragons:

Marco Polo lived during the 13th and 14th centuries A.D. He was originally from Venice, but he, his father, and his uncle travelled extensively to the Far East. His book, *The Travels of Marco Polo*, document much of his exploration into the regions of China, Persia, Tibet, and Burma (Polo, 1961, preface). Polo spent much of his book detailing the interesting customs of different ethnic groups he encountered. He also focused on the different animals and plants associated with these tribes.

In chapter 49, Polo related items of interest found in a province named Karajan. He reported that large quantities of gold were found in the rivers. He further noted that the citizens used cowrie shells as currency. He then described some of the animals associated with the area. He wrote:

Here are found snakes and huge serpents, ten paces in length and ten spans in girth [that is, 50 feet long and 100 inches in girth]. At the fore part, near the head, they have two short legs, each with three claws, as well as eyes larger than a loaf and very glaring. The jaws are wide enough to swallow a man, the teeth are large and sharp, and their whole appearance is so formidable that neither man, nor any kind of animal can approach them without terror. Others are of smaller size, being eight, six, or five paces long (1961, pp. 158-159)..

Polo continued his chapter by explaining how the local citizens of the area hunted and killed the creatures. He noted that the creatures were nocturnal (assisted by “eyes larger than a loaf”), dwelling in “caverns” during the day to avoid the heat. After the creatures killed their prey, Polo wrote that they would find a water source such as a lake, spring, or river. The serpents’ massive bodies left “deep impressions” in their paths “as if a heavy beam had been drawn along the sands” (p. 159). The creatures followed these same rutted paths regularly. Since their route was predictable, the natives buried large “wooden stakes tipped with sharp iron spikes, which they cover with sand” (p. 159). Polo reported that these spikes so severely wounded the creatures that they died quickly.

The book *Zuozhuan* tells the narrative of how the “ancients raised dragons and how the state used the services of two clans known as the Dragon Rearers and the Dragon Tamers.” (Sterckx, R., *The Animal and the Daemon in Early China*, 2012, p. 52.)

Ancient maps displayed “hic sunt dracones” As western pioneers colonized tribal lands around the world, reports of dragons continued to come back to Europe. It became standard practice for cartographers to identify the unexplored regions at the periphery of their maps with the cryptic words: “Here be dragons!”

# Dragons in History

**Famous in the annals of British literature is the poem of Beowulf, the heroic Norse warrior who killed multiple dragons. In the end he died in the process of vanquishing a winged dragon.**

**Above we see the poem of Beowulf written in Old English. Nothing like our English today, is it?**

**The great Swiss naturalist and medical doctor Konrad Gesner published a four-volume encyclopedia from 1516-1565 entitled *Historiae Animalium*. He mentioned dragons as “very rare but still living creatures” (p. 224). The story is told of a tenth century Irishman who encountered a large clawed beast having “iron on its tail which pointed backwards.” It had a head similar to a horse. It also had thick legs and strong claws. Could this have been a surviving Stegosaurus? (Ham, K., *The Great Dinosaur Mystery Solved*, 1999, p.33.)**

# LEARNING FROM LEGEND AND SCIENCE

Scientists dig up bones from the ground and do their very best to piece together the structure, muscle, fat, cartilage, and skin based on hypothesis and guess work. This is why they have made dinosaurs all types of colors in the past. There is room for the imagination to go wild. Ancient people drew what they saw and may not have had the art skills or computer aids that we have today. If we put them together I believe we will get a better picture of these animals. For example we are told that dragons lived in caves and would come out to eat and sometimes terrorize towns. This seem consistent with reptilian behaviors, and can teach us about dinosaur behaviors.

How would a scientist reconstruct a hippo skull if never observed alive? While we give them immense credit for their effort and work, there just isn't enough information to get a 100% complete picture of what the animal would have looked like.

the skull:

how alien would reconstruct the animal:

the animal:

The skull

How aliens would reconstruct the animal

The animal

# Dragons in History:

## St George and the Dragon

**A dragon was terrorizing Siline in Libya, The king's daughter was chosen as the next sacrifice, but Saint George saved her by killing the dragon with a lance. The king was grateful and offered George treasures, but George gave them to the poor instead. Today he has dozens of statues and monuments in honor.**

**We have pages of dragon stories and legends. This book is not long enough to hold them all but a few include:**  
**Fafnir of Sweden who slayed the Dragon**  
**A cobbler named Skuba killed Wawel the dragon in Krakaw Poland**  
**Tristan of Ireland who slayed the dragon to save the princess Ysuet.**  
**Merlin's life was saved because he predicted 2 dragons lived under the new castle plot. They fought and one dragon escaped.**

**This picture of St George fighting the dragon always intrigued me. If it stood up and if we removed the wings it would look so much like a theropod, such as a raptor or juvenile allosaurus.**

**This Dracorex Hogwartsia has a striking resemblance to a Dragon. This skull was recovered in Montana and is on display at the Museum of the Rockies.**

**This is a nice display showing side by side comparison of the dinosaur to the dragon it might represent.**

**This author, Vance Nelson, compares the dragon legends with what kind of dinosaur might have been represented with the ancient drawings and depictions. See his book Dire Dragons.**

Fig. 122 St. George & the Dragon engraving; c. 1525 A.D.

Compare it with the "dragon." Compare the sails, the heads, the legs, the orientation of the legs with respect to the body, and the number of toes.

Detail for detail—sail for sail, leg for leg, bone for bone, head for head, and toe for toe—these creatures match precisely. In fact, even the sizes match. The size of the creature in the drawing is eight feet or so, and the fossils vary but are up to nearly ten feet long.

On the following two pages, you can see a side-by-side comparison of the artwork and the reconstruction in a similar pose. We are clearly looking at the exact same animal. This is an absolutely spectacular match! These reptiles did not die out hundreds of millions of years ago.

Ctenospondylus reconstructions

**One page excerpt from the book "Dire Dragons"**

# I had to see for myself

I went to the oldest library I could find at the Univeristy of Utah. They had me wash my hands and then they placed the ancient Bestiary on foam wedges for me to view. A Bestiary is "a compendium of beasts" or animals of that time. I was to turn pages very carefully. Written in Greek or Latin, I couldn't read a thing but the images are worth more

Closer up. these seem like dragons and maybe the cockatrice mentioned in the bible.

These people are feeding dragon like creatures in the caves. Possibly to keep them at bay.

There seems to be different kinds depicted here: some with wings, some with 2 legs and others with 4

Left: This next image seems to depict a dragon eating a cow. Above: an elephant being devoured by a serpent or dragon of some kind.

# Dragons in the Book of Mormon

## The Nephites fight for a righteous cause.

*The people of Limhi began to drive the Lamanites before them; yet they were not half so numerous as the Lamanites. But they fought for their lives, and for their wives, and for their children; therefore they exerted themselves and like dragons did they fight.*

## This time the Lamanites fight, lead by wicked Zarahemna.

*yea, they did fight like dragons, and many of the Nephites were slain by their hands, yea, for they did smite in two many of their head-plates, and they did pierce many of their breastplates, and they did smite off many of their arms; and thus the Lamanites did smite in their fierce anger. Alma 43:44*

## HOW DID THEY KNOW WHAT DRAGONS FOUGHT LIKE?

**Was it because they saw alligators or snakes as some suggest?**

**An alligator is not ferocious to me. They lay out in the sun and easily scare. they are ambush predators. This paradigm comes from a lack of understanding of dinosaurs and the big picture of the flood and creation.**

Alligators do not seem like warriors to me

**Why didn't they suggest a lion, bear, or leopard? I think dragons were much more ferocious.**

**Ancient literature and sculptures of dragons match the scriptures. This lends credibility and credence to the veracity of the Book of Mormon and other ancient writings.**

# A dinosaur / dragon in the Manti, Utah Temple

**In 2024 the Manti temple had an open house for the public to come see. Several hundred thousand came through in 2 weeks.**

**In the creation room is depicted long necked animals in the water and a pterosaur like animal flying with no feathers. My guesser is broken on the other two down by the pleisousaur looking animal.**

**This is the oldest mural in any of the temples for the Church of Jesus Christ of Latter Days Saints. This mural was painted by Carl Christian Anton Christensen. He was a member who immigrated to Utah in 1857 and painted the mural in the 1880s.**

# Dinosaurs ON THE ARK...?

## ADDRESSING THE SKEPTICS

**If dragons... Also known as dinosaurs were alive after the flood and were not water-dwelling animals, they would have to have been on on the ark. I often ask this to people who wonder: "How do we know if a Giraffe was on the ark or not?" It is because they are around today and they survived the flood. The same goes for dragons. We are taught that "ALL flesh died that moved upon the earth, both of fowl, and of cattle, and of beast, and of every creeping thing that creepeth upon the earth, and every man: 22. All in whose nostrils was the breath of life, of all that was in the dry land, died. This is clear and specific. If it wasn't on the ark it died.**

**Q: Dinosaurs were too dangerous and would eat everyone:**  
**A: Remember, Jurassic park is a hollywood action film and what do hollywood do to films do best? Dramatize, embellish, exaggerate, and sensationalize. Lions and bears were on the ark and they didn't eat Noah. I've seen some pretty scary movies about lions eating man.**

**Q: Dinosaurs were too big:** **A: The big ones were big, but they are now buried in the mud as fossils. The average dinosaur was about the size of a dog. They were not all large. Look at their eggs. All of them are smaller than an osterich egg.**

**We can get into the theory of why they were so large in the antediluvian world. But for now I will just say, higher oxygen content, longer life span like Noah and Methuselah, and no rainbows before the flood. So there were some changes that took place.**

# What happened to the dragons?

**Dragons could have been trophies.**

**Ancient people used dragon blood and other parts in recipes.**

**In the last 500 years we have seen the extinction of 784 species including 338 vertebrates. 359 invertebrates and 87 plants in the last 500 years**

**Lions were, at one time, living and thriving in Greece and up as far as England, Germany, and modern day Turkey. See the documented decline.**

**REASONS THEY ARE SO RARE:**

**Dragons became pests. They were eating their sheep and princesses.**

**Dragon slayers became heroes.**

**There was no endangered species list. It was kill on sight.**

**They might not have adjusted to the post flood climate.**

**Similar to how animals today go extinct. Lions habitat loss shown below**

# IS EVOLUTIONARY THEORY REALLY THAT BAD?

If we haven't covered the type of evolution we are disputing. The word evolution can be ambiguous. So let's clear this up.

We do not dispute "change over time". Everyone see this.

"The common descent of all life on earth from a single ancestor via undirected mutation and natural selection" or darwinian evolution hasn't been proved, verified, or scientifically documented. This type of evolution has serious moral deficiencies.

The lack of accountability leaves a vacuum.

Bill Nye the Science guy is a role model for millions of children in schools today. I watched him in middle school growing up at least once a week.

He is a strong advocate of darwinian evolution.

She sings "its evolution, nothing new"

Today on the Netflix series "Bill Nye Saves The World" one episode promotes multiple genders. He teaches that gender is spectrum and there are not just 2 genders. Then he continues to rock out to the singer talking about her vagina, sex choices, and other vile and raunchy topics.

# CONSEQUENCES OF EVOLUTIONARY THEORY

"The foundation of Chinese Socialism rests on Darwin and the theory of evolution"  
*Communist Dictator Mao- Source: Yabya, Communism in Ambush, 130)*

**Most of the communist dictators were adopters of darwinistic evolution.**

**"All that is non-viable in nature invariably perishes... we humans have transgressed the laws of natural selection in the last decades. Not only have we supported inferior life-forms, we have encouraged their propagation... Individuals lower than any beast."**

**Opfer der Vergangenheit (Victims of the Past) was used in order to bolster public support for the planned T-4 Euthanasia Program for the mentally ill, which they called "inferior life-forms,"**

**Many miss the part of Darwins book that says "or the preservation of favoured races in the struggle for life" The book supports the idea that some races are further evolved and others are less advanced, and therefore, less valuable.**

**"the communist core idea that violent revolution, in which the strong overthrow the weak, was a natural, inevitable part of the unfolding of history from Darwinistic concepts and conclusions. Evolution effects sociology, business development, anthropology, every area of our lives."**

**The Darwinian Foundation of Communism Reproduction of the article at answer is genesis site**

**by Jerry Bergman. <https://sites.google.com/site/luis-afonso/darwinandcommunism>**

"No intelligence allowed" free documentary By Ben Stein found at this QR code.

One of the first of many school shootings, sadly, was the Columbine, Colorado Shooting. Eric was spouting darwinian views such as his shirt that said "NATURAL SELECTION" on the day he went in to the school carrying guns and Ammo.

Evolution can make life seem less precious and valued. Therefore, discarding life is not a moral dilemma for those with no morality.

Margaret Sanger, founder of Planned Parenthood, said "The most serious charge that can be brought against modern 'benevolence' is that it encourages the perpetuation of defectives, delinquents and dependents. These are the most dangerous elements in the world community, the most devastating curse on human progress and expression."

<https://www.icr.org/article/evolution-american-abortion-mentality/>

She advocated applying "a stem and rigid policy of sterilization and segregation to that grade of population whose progeny is already tainted, or whose inheritance is such that objectionable traits may be transmitted to offspring."

Getting rid of all the stupid and weak organisms."  
-Columbine shooter Eric Harris, on his website

Between 1939 and 1941 over 100,000 physically and mentally disabled Germans were killed in secret, without the consent of their families.

But Eugenics ALSO appened in America.

# EVOLUTION can LEAD TO A LOSS OF FAITH and HOPE; IT can LEAD TO ATHEISM

## LOSS OF HOPE:

**Dr Will Provine "oh I was a christian... He (his college professor) started talking about evolution as if it had not design in it whatsoever. I want you to stand up in front of the students and tell them a lack in evolution. I read that book so carefully and could find no sign of there being any design whatsoever in evolution. I immediately began to doubt the existence of the diety. But it starts by giving up an active diety and then it gives up the hope that there is any life after death. when you give those two up the rest goes easily. give up the hope in an imminent morality and then hope in free will. There is no hope whatsoever of there being any meaning in life. We live and we die and then we are gone"**

**William Ball Provine (February 19, 1942 – September 1, 2015) was an American historian of science and of evolutionary biology and population genetics. He was recently diagnosed with brain tumor.**

Ben Spackman states "It remains an active problem, unfortunately.. this is from a friend of mine who lost his faith in the last two years, he said that..."

IS THIS A PROBLEM?

One of my primary reasons for leaving was because I came to understand that biological evolution was a real thing, and that meant that the \*whole\* of the Genesis Garden of Eden story was \*not\* literally true history, something which I had been taught every day in the Church.

Ben Spackman, a PHD student at BYU, is ironically an evolutionist but shares how his frind left faith due to evolutionary theory.

*When they are learned they think they are wise, and they hearken not unto the counsel of God, for they set it aside, supposing they know of themselves, wherefore, their wisdom is foolishness and it profiteth them not. And they shall perish. But to be learned is good if they hearken unto the counsels of God." (2 Nephi 9:28-29)*

# The Origin of Life

**Evolution cannot find the origin of life.**

**The theory begins with a bang and ends with death and decay.  
HOW does life form from rocks on a cold wet earth?**

**Their theory is that after the meteors crashed into each other for billions of years, it rained upon the rocks somehow and over time abiogenesis occurred. Although, they have never been able to produce a single protein in a controlled environment. What makes them think something as complex as DNA could form from a harsh environment. The law of thermodynamics states that things deteriorate into chaos and decay not organization and design.**

**DNA is the most complicated information system on earth. As we learn more about DNA, we are finding a more increasingly complex information system that directs cells. It is more advanced than any computer program on earth that were also created by intelligent minds.**

**The chances of getting amino acids to align sufficiently in a row to form proteins, is like getting a perfect match on a slot machine and doing it perfectly over 250 times!!**

Learn more about probability of DNA forming by random chance from this video:

**Imagine getting the jackpot on 250 of these at the same time!**

**You might be surprised how much faith it takes to believe in abiogenesis. Some might argue it is an ideology more than a scientific theory.**

## **A simpler plan to have faith in:**

**I, God, moved upon the waters. God made man from the dust of the earth. "Male and female created he them" Gen 1: 2,27**

**Why is it so hard for man to believe in God? Why do they look for things they cannot understand?**

# What is up with carbon and radiometric Dating?

"Don't scientists have rigorous testing methods for accurately measuring dates of rocks and fossils? Don't you trust carbon dating, Jeremy?"

Good question. Carbon dating only works for things less than 50,000 years old, usually. The dating methods most common are radiometric, finding the half life of isotopes. The methods are: argon-argon dating, potassium-argon, uranium and others.

## BUT HOW DO WE KNOW IF THEY ARE ACCURATE?

We have to test it with the known ages of rock. The tests have shown consistent old ages in rocks formed with known ages. See below the figure displaying the KNOWN age to the MEASURED age. What has gone wrong?

Table 1. Young rocks from recent eruptions (<1000 years old) yield greatly exaggerated apparent ages. The data used in this table was retrieved from mainstream scientific journals.<sup>7,8,9,10,11,12</sup>

Location	When Lava Extrude	Measured Age
Hualalai basalt	1800-1801 A.D.	1.6 million years
Mount Etna basalt	122 B.C.	0.25 million years
Mount Etna basalt	1792 A.D.	0.35 million years
Mount Lassen basalt	1915 A.D.	0.11 million years
Sunset Crater basalt	1064-1065 A.D.	0.27 million year
Kilauea basalt	<200 years ago	21 million years
Kilauea basalt	<1,000 years ago	42.9 million years
Kilauea basalt	<1,000 years ago	30.3 million years
Kilauea Iki basalt	1959 A.D.	8.5 million years
Mount Stromboli	1963 A.D.	2.4 million years
Hualalai basalt	1800-1801 A.D.	22.8 million years
Rangitoto basalt	<800 years ago	0.15 million years
Mount Erebus	1984 A.D.	0.64 million years
Mount Etna basalt	1964 A.D.	0.7 million years
Medicine Lake obsidian	<500 years ago	12.6 million years

Rocks don't come with the ages stamped on them

The formula is **ACCURATE**. **YES**, I said that. The formula is accurate. It is the assumptions and inputs that are throwing off the dates.

If one of the 3 critical assumptions is off the dates can be far off.

- 1) No daughter atoms or decay products were initially in the system
- 2) Parent and Daughter atoms cannot leave the system
- 3) Constant decay Rate: the rate at which the parent atoms decay must have been constant in the past and the same as today's measured rates.

# Missing Links... Still Missing

**Our children are being taught in schools and museums that they evolved from an ape. This is what has got me motivated to put time and energy into sharing the truth.**

**There have been no links found between animals kinds. No cat-dogs or the like. I've watched many debates on the topic and there just isn't proof without the millions of years. So what are they finding from these so called missing links?**

**That's what they found...**

**That's what evolutionists made**

**The skeleton has no eyes and no feet. Then why does "Lucy" have white eyes and human feet? Because it fits their narrative.**

**"Lucy" is more like art than science. Today she is debunked with the Piltdown man and all the others. Today she is shown to have just been nothing more than an ape. Read "Contested Bones for more information", Look up Piltdown man fraud that plagued our textbooks for decades.**

**Yes Donald Johanson the man who discovered the "Lucy Bones" is an atheist. He speaks at the Freedom From Religion conference.**

**They found less than 30% of a skeleton. He went out with a grant to "find a missing link" Some of the bones from the site were from a pig. I wish we had space to dig more into the craziness here!**

**Hear what he says about God and religion here:**

**One day we will look back in awe at what was distorted and presented as "science."**

# What I'm trying to say is, **YOU ARE MAGNIFICENT!**

**YOU WERE INTENTIONALLY CREATED IN GOD'S IMAGE WITH SO MUCH LOVE!**

**NOW I ASK, as Jesus asked the Brother of Jared.  
DO you see that He created You?**

**You are worthy of his love.  
Reach out to feel his love.**

**"Seest thou that ye are created after mine own image?  
Ether 3:15.**

IF DRAGONS ARE A MYTH WHY ARE THEY PLASTERED ON MY BEDROOM WALL, MY TV SCREEN, MY PILLOW, BEDSHEETS, AND MY DREAMS ARE FILLED WITH DRAGONS? HMMM

*If you had a pet dinosaur, would you take him for a walk?*

*Or would he Walk You?*

*Dino, slow down, I can't get another speeding ticket!*

**DRAGON = DINOSAUR**

# BONUS Pages: Dinosaurs living today.

You are thinking right now, "I suspected you were crazy, but now I'm sure you are nuts!"

Could there really be some alive on our small planet?

The tasmanian tiger was thought to be extinct but there may be sightings of this animal today.

This jungle gorilla was a mystery before 1901. Amazing what we are still learning

**NOW YOU HAVE LOST IT!**

Many say they couldn't go unnoticed with so many people on earth and cell phones with a camera now.

However, the jungle gorilla wasn't discovered until 1901. Water dwelling, nocturnal, or amphibious animals can hide under water and almost completely disappear.

The Africans said they had a zebra-giraffe hybrid. Westerners didn't believe them until they brought out pelt of, what we now know as, an okapi.

We have shown that seemingly mythical animals lived with ancient peoples just hundreds of years ago as "dragons."

Natives said they had this animal, we didn't believe.

# SIGHTINGS IN THE AIR

## THUNDERBIRD

Honestly I have no information on this photo

Kongamatos are large pterosaur-like cryptids living in tropical and subtropical regions of Africa, particularly in Zambia, the Congo, and Angola.

OH I forgot these other water sightings:

April 26, 1890 the Tombstone Epitaph published an incredible article of six gunslingers shooting the Tombstone Thunderbird right out of the sky.

Similar to the tombston photo. with less description.

Today Jonathan Whitcomb documents pterosaur sightings from California to Australia and Papua New Guinea

# SIGHTINGS ON THE LAND

Learn more with this link

## *Mokele Mbembe - Congo*

This eyewitness is being interviewed about his sighting

**The Congo has 690,000 square miles, largely unexplored. There are approximately 10,000 species of tropical plants in the Congo Basin and 30 percent are unique to the region including endangered wildlife, and forest elephants.**

Roy Mackal explored the region and documented his findings in his book. The footprint is documented in his travels.

Roy Mackal has been to the Congo looking for the animal

Explorer Michel Ballot finds a footprint in the sand. He is still doing expeditions into the Congo.

The people are identifying pictures of known and unknown animals. They point to a long-necked dinosaur and say we have that here! Credit: William Gibbons

# IN THE BEGINNING GOD CREATED THE HEAVENS AND THE EARTH.

**Jeremy has spent his professional life working in Real Estate. After his 2 oldest sons formed a strong infatuation with dinosaurs, Jeremy found a fascination in the idea that they could have lived with man, supporting scriptural accounts, and aligning with a less popular creation science. Sharing the truth of the literal creation, with fossils and history to support the narrative, is a refreshing experience for Jeremy. He has now put time into sharing these truths with others to promote faith in a time of need. His wife and 4 kids have been a tremendous support and inspiration. They are owed a debt of gratitude for their time, sacrifice, and support.**
